

Architectural Aluminium Solutions

Artist impression

ALUMA **TEX**

Sustainable. Durable. Timeless.

Alumatex combines natural finishes with the strength of aluminium.

Our range of architectural battens, cladding and slat systems is available in a wide variety of high-quality finishes, including sublimated timber effects and durable Textura® powder coating. Using advanced sublimation technology, Alumatex achieves the natural warmth and texture of timber, while delivering the low-maintenance performance and longevity of aluminium. Manufactured from locally extruded, low-carbon aluminium, the range is a smarter, more sustainable choice for modern architectural design.

Slats

Our slats integrate effortlessly with our specially designed posts and framing systems, making them ideal for shutters, louvres, fences and gates.

Battens

Our innovative two-part batten system clicks together seamlessly, providing a sleek aesthetic without visible fixings.

Cladding

Designed for easy installation, our interlocking cladding boards protect your building from the elements while adding aesthetic appeal.

TM

YEX

ALUVA

An architectural sketch of a modern building facade. The sketch is rendered in a dark, monochromatic style with fine lines and shading. The building features a mix of textures: a section with vertical slats, a section with a stone-like pattern, and a section with horizontal lines. Large windows and balconies are visible. The overall style is clean and contemporary.

Colour Range

Alumatex comes in a versatile range of premium finishes.

Our advanced sublimation process recreates the rich textures of timber, while our Textura and Stone Effect coatings provide durable, contemporary options.

Woodgrain

The warmth of timber.
The strength of aluminium.

Our woodgrain finishes are crafted using an advanced sublimation process that recreates the natural grain, texture and tonal variation of real timber, without the maintenance issues. Choose from a curated range of rich Australian-inspired tones to match your vision.

Stone Effects

Natural texture.
Refined strength.

Inspired by the raw, earthy beauty of stone, our stone-effect powder coat finishes add an organic touch to architectural spaces. These finishes are perfect for contemporary or minimalist designs seeking depth and natural variation. Like all Alumatex options, they offer long-term durability and weather resistance, ideal for facades, soffits and high-impact surfaces.

Textura

Bold and modern.

Our Textura range features architectural-grade powder coatings with a fine matt finish that resists marks, scratches and wear. These colours are ideal for modern exteriors and high-use areas, offering a smooth, refined look with lasting performance. Popular in urban, coastal and commercial settings, Textura finishes pair beautifully with timber tones or stand strong on their own.

Battens

Quick to install. Designed to impress. Built to last

Our innovative two-part batten system clicks together seamlessly, providing a sleek aesthetic without visible fixings.

Colour: Woodgrain - Kwila
Batten profile: 50 x 100mm

An architectural rendering of a modern building facade. The upper portion features a window with vertical woodgrain slats. Below the window is a horizontal band of greenery. The lower portion is a large wall of horizontal woodgrain slats. The building is set against a clear blue sky with some trees in the background. A gravel driveway leads to the building. A white planter with a green bush is in the foreground on the left. A white wall with more greenery is on the right.

Slat System

Lightweight, durable and ready for any environment.

Our slats integrate effortlessly with our specially designed posts and framing systems, making them ideal for screening, fences and gates.

A modern building facade featuring woodgrain slats in a French Walnut finish. The slats are used for window frames, balcony railings, and a ground-level fence. The building has a clean, minimalist design with large glass windows and a white facade. The sky is a clear blue with light clouds, and there are green plants in the foreground.

MADE IN AUSTRALIA

Designed and manufactured in Australia, Alumatex meets the highest local standards, ensuring superior quality, faster lead times and reliable warranties.

SUSTAINABLE & ECO-FRIENDLY

Made from recyclable, low-carbon aluminium, Alumatex is the smarter choice for eco-conscious projects without compromising on style or performance.

AUTHENTIC NATURAL LOOK

Crafted using our state-of-the-art sublimation process, Alumatex replicates the natural grain, texture and warmth of real wood and stone.

NO WARPING

Unlike timber, Alumatex won't warp, shrink, splinter or twist over time, ensuring long-lasting structural integrity.

LIGHTWEIGHT

Alumatex's aluminium composition makes it significantly lighter than natural materials, allowing for easier handling, transport and installation.

ABSORBS HEAT

Designed to manage heat effectively, Alumatex resists excessive heat absorption, making it a comfortable and practical choice for outdoor spaces.

FIRE RESISTANT

With a high fire safety rating, Alumatex provides a safer alternative to timber, making it ideal for fire-prone areas and high-risk environments.

ALL-WEATHER PROTECTION

Built to withstand harsh climates, Alumatex is corrosion-resistant, waterproof and won't swell, rot or rust, ensuring durability in any environment.

LOW-MAINTENANCE

Scratch-resistant, non-porous and insect-proof, Alumatex requires minimal upkeep — no sealing, staining or painting needed — just lasting beauty.
